EXAMINER'S AMENDMENT

The amendment and declaration filed December 14, 2004 have been acknowledged.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the substitute specification:

A. Paragraph [04], the recitations with regard to the cultivar names within double quotes "Ramsey" and "Schwarzmann" have been changed to single quotes.

B. Paragraph [23], the cultivar RS-9 has been changed to include single quotes.

Reason for Allowance

The information regarding the cultivar RS-9 was described in the FPMS (Foundation Plant Materials Service) Grape Program Newsletter (October 2001) and the Hashim reference (Nov./Dec. 2001) as a possible offer for sale or public use in this country, more than one year prior to filing of this instant application. A sale of the invention in this country, more than one year before the date of the application would constitute a bar under 35 USC 102(b).

In the response filed December 14, 2004, Applicant states that FPMS and OTT (Office of Technology Transfer) are wholly owned division of the University of California (the assignee of this instant application). Applicant states that FPMS receives plants developed by the University of California and conducts test for pathogen and pest contamination. Furthermore, Applicant states that FPMS also license the plants from the University to other nurseries with

Art Unit: 1661

approval from OTT. OTT also license patented varieties to other nurseries. See page 4 of reply.

Applicant states that the instant cultivar had never been publicly available through FPMS without consent from OTT, and the earliest release of the instant cultivar occurred August 27, 2003, less than one year prior to the filing of this application. In addition, Applicant states that the earliest release happened on July 28, 2003 by the breeder to other parties for test purposes, less than one year prior to the filing of this instant application. Moreover, Applicant states that FPMS did not sell or donated the claimed cultivar to California Foundation. See page 5 of reply.

Applicant states that the FPMS newsletter on page 4 stating "Nurseries interested in becoming licensed to propagate these varieties should contact Melissa Kimball at OTT phone..." was not an offer for sale. Applicant further states that the instant cultivar was never released to nurseries more than one year prior to the filing date of this plant application.

Applicant states that the information regarding the instant cultivar in the Hashim reference was concerning the testing of different grapevine rootstock. The experiment occurred at the University of California and was not in public use. See page 6 of reply. As a result, there is no evidence of the instant plant being in public use or on sale in this country, more than one year prior to the effective filing date of this instant application.

The specification provides as complete a botanical description as reasonably possible of the claimed plant. The completeness of the description is sufficient to distinguish this new plant from the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
